

hard to believe

A friend is working in Mukono/ Uganda with people who are disabled. She told us about a company, bringing tools for such people into the country.

We asked David, what Kind of tools are needed in the environment of Ot Pa Wora.

Here is our report from 3 people. They have been giftet and blessed and that will change their daily life.

This man is a miracle. he never has been able to use his leg or his feet. when he went to school, he did it with Flipflops on his hands. to protect them from stones and other things. He is a farmer working hard in the field. At least he is father of seven children. Take a look;

In the neighborhood is living a Woman, who had an Accident two years ago. She is not able to walk or to stay. She has some wooden crutches but it takes her a lot of power. When she was coming for prayer, she left this tools outside and moved inside sitting on the ground.

Now she has an other new tool. She is standing in front of church. The worship is starting and this Woman begin to dance inside this new tool: "praise the Lord, I'm able to dance for him again."

at least there is this man. He is blind and very happy to get this stick.
